

The image shows a bright, modern library interior. In the foreground, there are several blue upholstered wooden chairs and tables arranged for reading. The floor is highly reflective, showing the overhead lights. In the background, there are bookshelves and a blue sofa. To the right, a glass wall with horizontal blinds is visible, with some colorful cards or notices pinned to it. The ceiling has recessed lighting and a yellow decorative band.

ABOUT THE LIBRARY

- **Centre place** for library & information services
- **Innovative partner** in teaching, learning and research activities
- Responsible for acquisition, processing, organizing & providing access to **high quality scholarly information** resources
- **Contributes** to the achievement of Institute's mission

VISION, MISSION & OBJECTIVES

Vision

To be a **premier** Learning Resource Centre in STEM, H & SS and allied areas

Mission

To provide access to **high quality** information resources in all forms to IITGn community & achieve excellence in service

Objectives

To identify, select, collect, create, organize, preserve, manage and provide access to information sources in print, non-print and digital forms, regardless of their physical location, to **support scholarly pursuit, learning, teaching and research in the Institute**

BE AWARE OF PREDATORY PUBLISHING?...

Word 'Predatory' was coined by by Jeffrey Beall in 2010

...predatory publishers...publish counterfeit journals to exploit the open-access model in which the author pays. These predatory publishers are dishonest and lack transparency. They aim to dupe researchers, especially those inexperienced in scholarly communication.

Beall, J. (2012) "Predatory publishers are corrupting open access", Nature, vol. 489 iss. 7415.

Citation and Reference Style Guides

There are a number of different reference and citation styles available. Styles are basically well-established practices and conventions. Depending on the discipline in which one is working and also the widely used style in the respective discipline, one can decide to select and use a particular style.

Following links provide the list of varieties of styles and also the guidelines for using. If you have any questions or need guidance in using, please contact the library staff at librarian@iitgn.ac.in

IITGN Library: Journey so far...

The Library at IIT Gandhinagar has been a part of the institution since its inception in 2005. Back then, it was operating from the 6 Block, Infrastructural Development Engineering College, Chandigarh, with a collection of a little over 5000 books and only 2 staff members, assisted by 2 parents and an attendant.

By July 2011, the Library shifted to Block 2 of Administrative, Government Engineering College, Chandigarh to provide an adequate and dedicated space for the IITGN community.

It continued to serve the community for almost the next 10 years from this accommodation.

The following year, i.e. 12th April, 2015, when we were moving the library to present location, the library started to provide an in-house service to promote the Paid Campus with Mini Library in the Student Hostel Area. This started with an initial

2000 Library Collection

From down the hall of AB/3

IITGN library is designed to meet the first use of its constituent Lib-InfoCast with you all. The objective is designed in trying to give publishing details regarding the various journals, books, and articles of IITGN Library in a simple and user-friendly mode. The priority of the library is to bring IITGN FeedBack from the students, research and staff to enhancing work for your library. We are the mainstay of the self-Service (Self-Check-out) Self-Check-out, so our goal is to make access of your library easy to use and available to make student attainment of the library and services.

We look forward to hearing from you in a hope our visit helps the library more helpful and practical in helping you in all your library queries.

Happy Reading!

Browser Extensions to Locate Full Text Research Articles

Browser extensions have become a key for many using the internet. First introduced in 1998, browser extensions and software components that perform various functions in a specific and easy manner. A bunch of them have been developed to assist the researcher and academic journals to discover the feasibility of searching full text articles, however, there are those that a reader linear extensions provided at regular time and finding the right one is just as much a task as when the browser extension is trying to solve. Thus, we have provided a list of browser extensions that we think will assist you based on your research. Take a look:

EN EndNote - Click EndNote

Click EndNote is designed to be a browser extension that allows users to access full-text PDFs of research papers and the list of references directly to open access. It is perhaps one of the most popular browser extensions in the academic world. Also known by Elsevier EndNote, the name and logo of the old end note has changed without major functional changes.

Google Scholar Button

Google Scholar Button is a browser plugin that provides easy access to Google Scholar from any website. This helps in finding full text articles on the web or among the subscribed sources, simplifying research from web search to Google Scholar. Further references in web page (not available on the web) are also available on Google Scholar. Further references in web page (not available on the web) are also available on Google Scholar.

Open Access Button

Open Access Button (OAB) provides free access to open access journals. It can search the resources directly on the website of the browser plugin for Chrome or Firefox in search for free.

Unpaywall

Unpaywall is a browser plugin that allows users to access full-text PDFs of research papers from over 50,000 journals and open-access resources from over 100,000 open-access journals. It can search the resources directly on the website of the browser plugin for Chrome or Firefox in search for free.

Career Corner

People, with dreams in their eyes, walk into the library to discover their soft skills, learn management skills, and other skills, along with sharpening themselves as individuals. Although the Library at IIT Gandhinagar has acquired many books dedicated to career development, all were scattered across the shelves. So, in the beginning of August, 2021, Library inaugurated a spot at the top of the lobby area and the reading table to place the books pertaining to career development, along with inspirational biographies and some Harvard Business Review management books. Another major step to create this space was due to the transfer of a large number of books from the Career Development Office. Cutting the red ribbon, the Library Team is happy to feature the collection, the "Career Corner" amongst and the community was informed. Since then, the corner has attracted many students as well as staff members to visit and pick up a book, although it is still in a nascent stage. But we expect this corner to flourish in the coming days. We want to make the "Career Corner" a one-stop solution for any career-related queries, and we are developing the collection with time. So, if you have any suggestion for resources or services that you think the library can provide through the Career Corner, do not hesitate to mail us at lib@iitgn.ac.in.

Library Technology Update: CORAL

With the increasing substantiation of e-resources, linked to the systems, it was getting more difficult to track the full cycle of subscription. This copy data, this format details and all such associated processes were becoming more and more complex. The rapid growth in subscriptions, combined with the need to track all the data, was a challenge for the library. The CORAL system was developed to address these challenges.

The CORAL system is a comprehensive solution for managing library subscriptions. It provides a centralized platform for tracking subscription data, including titles, volumes, and pricing. The system also offers tools for managing subscription renewals and cancellations, ensuring that the library's collection remains up-to-date and relevant.

IITGN Research in Open Access Publication

In the world of scholarly publishing, the increasing use of journal subscriptions and the rise of Open Access (OA) publications have led to a new era of publishing. External Membership

Library at IIT Gandhinagar has always been a gateway for knowledge for the institute members. The library keeps looking to depth and breadth with introduction to new services and addition of diversified resources in order to serve the intellectual requirements of the users. With innovative ways to provide information, it seeks to expand the knowledge sharing only among the members. After years have thought in mind, Library offers membership by various professional members, namely:

- Industry & Corporates,
- Academic Institutions, and
- Individuals whose academic interests align with that of IITGN.

Members who are interested in joining the library should contact the library at lib@iitgn.ac.in or visit the library website at lib.iitgn.ac.in. The library website is available here: <http://lib.iitgn.ac.in>. We request the institute community to help spread a word among their know circle about this facility offered by the library.

Authors of IITGN: 2021

The job of any academic or research institution perhaps lies in the quality and quantity of its publications. The fact that publications are also a determining factor in the ranking of institutions, the faculty, researchers, and students are motivated to contribute more and more articles of IITGN. While diving into all of that might take some time, this year would require the books published by IITGN authors in the year 2021.

MicroQR and Creative Commons

MicroQR is a tool that allows users to create QR codes for their research papers. Creative Commons is a non-profit organization that provides a range of licenses for the use of creative works. The library has implemented both MicroQR and Creative Commons to make it easier for users to share their research and to ensure that their work is protected and properly attributed.

Author of the Week

Our team has put together a list of books authored by **John Archibald Wheeler**. He was largely responsible for reviving interest in general relativity in the United States after World War II. Wheeler also worked with Niels Bohr in explaining the basic principles behind nuclear fission. Together with Gregory Breit, Wheeler developed the concept of the Breit-Wheeler process. He is best known for popularizing the term "black hole," as to objects with gravitational collapse already predicted during the early 20th century, for inventing the terms "quantum foam." “

“To ask why we need libraries at all, when there is so much information available elsewhere, is about as sensible as asking if roadmaps/GPS are necessary now that there are so many roads.”
